

# PHYSICIAN'S ORDER FORM FOR BREAST IMAGING / MAMMOGRAPHY

PATIENT	
	/ /
Patient's Name	D.O.B.
Daytime Phone	Appointment Date and Time

## EXAMINATION

### Screening Mammogram

- Asymptomatic / Patient aged 40 or older
- Asymptomatic / Patient under 40 with elevated risk of Breast Cancer

### Diagnostic Mammogram

- Bilateral  Right Unilateral  Left Unilateral

### Breast Ultrasound

- Bilateral  Right Unilateral  Left Unilateral

### DEXA SCAN

### Reasons For Diagnostic Mammogram / Ultrasound

- Palpable Lump or Thickening in Breast or Axilla (MARK LOCATION ON DIAGRAM ⇨)
- Focal Breast Pain (MARK LOCATION ON DIAGRAM ⇨)
- Breast Skin Abnormality
- Nipple Discharge or Nipple Abnormality
- Abnormal Screening Mammogram
- Short Term Follow-up (Post Biopsy, Radiologist Recommendation)
- Breast Cancer History ( Lumpectomy, Mastectomy)
- Abnormal Imaging Study Suggesting Breast Abnormality  
(CT, MRI, Nuclear Medicine)
- Male Breast Abnormality
- Implants
- Other Diagnostic Indication for Exam

DESCRIBE REASON FOR DIAGNOSTIC EXAM AND/OR ULTRASOUND AND MARK ABOVE DIAGRAM

**To obtain or release copies of radiological film and/or transcriptions.**

Patient's Name (print) \_\_\_\_\_ Patient's Signature \_\_\_\_\_

Location of last mammogram \_\_\_\_\_

## GENERAL PATIENT INSTRUCTIONS

- PLEASE BRING YOUR INSURANCE CARD.
- Plan to arrive 30 MINUTES BEFORE your scheduled appointment.
- BRING previous X-Rays or scans that are related to your current exam.
- Take prescribed medication according to your physicians instructions.
- All patients requiring either IV or oral contrast should fast for at least 4 hours prior to their exam.
- **Diabetic** patients should also fast for 4 hours prior to their exams. Type II diabetics should skip their morning dose of oral medication. Insulin dependent diabetics should consult their physician regarding their insulin dose prior to their exam.
- **Dialysis** patients should plan to be dialyzed within 24 hours following IV contrast.
- Patients receiving sedation should arrange for transportation to and from the center.

## CT PATIENTS

- CT patients may require IV and/or oral contrast. Please review with your physician and/or 3T Imaging staff if you have any questions regarding contrast.

### Patients requiring IV Contrast:

- Patients with a **history of asthma, diabetes, kidney disease, severe allergies, or a history of prior contrast reaction**, MUST notify the front desk staff and/or technologist prior to their exam.
- Patients with **prior adverse contrast reaction** MUST have their referring physician contact our office about premedication.
- Patients **over 65 years** MUST have lab results for BUN and CREATININE within the previous 30 days.
- Patients with a history of **diabetes or kidney disease** MUST have lab results for BUN and CREATININE within the previous 30 days.
- Patients on **Glucophage or Glucovance** should withhold these medications for 48 hours following IV contrast (Consult your physician before restarting).

### Patients requiring oral contrast:

- If your doctor is requesting an abdominal CT, you may need to drink contrast solution 2 hours prior to the exam. Please review with your doctor and you may pick up a bottle at least two hours prior to your scheduled exam at 3T Imaging. If you are unable to pick up the contrast, please arrive two hours before your appointment to drink the contrast.
- Please call us if you have any questions.

## MRI PATIENTS

- Abdominal MRI, Pelvic MRI and MRCP patients should fast for at least 4 hours before the exam.
- Patients receiving IV contrast should fast 4 hours before the exam.
- Patients with **Pacemakers** MUST not have MRI examinations.
- Please contact us AS SOON AS POSSIBLE if you have a history of the following:
  - **Brain aneurysm clips**
  - **Artificial heart valve**
  - **Metal in your eyes**
  - **Cochlear implants or ear tubes**
  - **Other implantable devices**
  - **Vascular Filter or Stent**
- Most surgically placed **orthopedic devices** are MRI compatible
- Please call us if you have any questions about MRI safety.

## ULTRASOUND PATIENTS

- Abdominal and gallbladder ultrasound patients should fast at least 6 hours before the exam (no food or drink).
- Diabetic and pregnant patients may eat a light meal prior to their scan.
- Pelvic ultrasound patients may require hydration and a full bladder.
- Please call us if you have any questions.

## NUCLEAR MEDICINE AND NUCLEAR CARDIOLOGY PATIENTS

Please contact Naperville Imaging Center for specific instructions regarding your particular study. Some exams may require you to refrain from drinking coffee and eating 4 hours before your study.

## MAMMOGRAM PATIENTS

- Please do not wear any deodorants, lotions or powder on the day of your exam.
- Please wear 2 pieces of clothing as you will be given a 1/2 gown to wear during your exam.

- **Naperville Imaging Center** is located at 1888 Bay Scott Circle just North of 75th Street, between I-355 and I-59.
- **From Route 59**, go East on 75th St. 1 mile to Book Road, turn left (North) on Book Road to Three Farms Ave. 1 block, turn right (EAST) on Three Farms Ave. to Bayscott Circle, turn left and follow curve to 1888 Bay Scott Circle.
- **From I-355**, go West on 75th St. (past Washington St.) to Book Road, turn right (North) on Book Road to Three Farms Ave. 1 block, turn right (East) on Three Farms Ave. to Bayscott Circle, turn left and follow curve to 1888 Bay Scott Circle.
